Coefficient	/100	
Grade Distribution	Application of the notion explained	50%
	Creativity	50%

Learning Outcome and Description
The goal of the art session is to develop the student's creativity, manual skills, artistic skills, and cultural background to help him appreciate the field of fine arts. Furthermore, the art session works on enhancing the student's communication skills. We have a different occasion that the children take a special gift done by their artistic hand exam.: Impedance day, St Barbara, Christmas... (teacher's helper, discussions, group work...), self confidence, and artistic taste. Above all, the art session provides the student an atmosphere of self expression, relaxation, and fun.
